(University of Sussex Value for Money Policy

Request to Heads of School and Directors of Professional Services

Thisdocumentsummarises the position of the UniversitygardingValue for Money(VfM).

Heads of School and Directors of Professional Services sked to read page 1 of the document and nominate a member of staff with a borad knowledge of activities in their areas to identify current fM practice. This will enable us demonstrate the extent to which VfM is already embedded across the University. It is expected that this will require a maximum of 23 hours input.

We will follow upwith you individually to discussary queries or concernysou may have Alternatively, please email the name of an appropriate contact to Sian Thomas gour Finance Business Partner.

NB Further detail to support the key points is contaimed ppendices 1,2,8ttached.

Sian Thomas, April 20

1. OfSValue for Moneyrequirements

The OfS requires universities to ensure VfM for students and the tax payer in return for their investment, with their understanding of VfM expressed in terms of outcomes and inputs:

students receive Value for Money when the properties of higher education both during their studies and afterwards in exchange for the effort, time and money they invest taxpayers receive Value for Money when higher education providers use public money and student fees efficiently and effectively to deliver graduates, from all backgrounds, who contribute to society and the economy.

It is the view of the General Counsel that were there to be a challenge on the basis of VfM at the moment it would most likely come from the studented (or their parents) around teaching arrangements during lockdo@MA analysis has been prepared to address this wever, it is clear that, however VfM is framed, we have a responsibility to students and tax payers to treat their resources with respect 'make the most of them', and we need to be able to be able to be monstrate this.

2.

Our VfM policy states that 'Our overall strategic aim is to achieve a world-class standard of teaching and research by managing our resources effectively and efficiently'.

The University will maintain the value of a Sussex deg

1. Putting VfM into practice and demonstrating this

There is already a lot of odVfM practice in the University, for example

We have articulated appriorities and goals in the Sussex 2025 framework and recognised when it was published thatby working towards a shared vision and having an understanding of our common goals, we [would] prioritise our efforts to deliver our objectives Aligned with this commitmentwe are undertaking the 'Size and Shape' programme which aims to ensure Sussex can be a University with the best possible environment for research and scholarship and that our education is both outstanding and responds to what students want to studylt will also ensure that we are able to generate sufficient surpluses to invest in our physical and digital infrastructures and help us get closer to our strategic goals. We have robust governance and management around projectives here Project Review Group will ensure that appropriate resource is available for projects and that we are velicing Value for Money. We already have omprehensive policies and proceedures that have been deigned to deliver VfM by e.g. being simple to follow, miniming risk and securing the right outcos for the University. In many case training and other resource is available of support staff understanding decision making of there is often monitoring of compliance identify areas of riskThis means that on a day to day basis VfM can largely be achieved by following policy and proceeds: Decempleting and asking for advice from expert services where relevane (g.HR, OGGC, Finanete.).

We have an evolving and effective integrated planning and budgeting process which ultimately translates strategic and operational riorities into financial plans wherappropriate levels bresource are allocated a measurable framework. This should ensure that on a day to day basises ources are committed coording to agreed priorities and that material variances to those plans are appropriately understood at the brized again supporting the delivery of good VfM.

1.1 However, whilst VfMs often implicitly embedded into ways of working we still have some way to go to ensure all staff explicitly understand VfM to the point where it is 'embedded in our culture' an ³/₄
